PROJECTS

KEGG, AAindex, MAGEST, FullMite

Research activity

- Construction of the KEGG database (KEGG API, EGENES, OC, KGML)

- Evolution of the protein domain architectures.

- Biology of the Apicomplexa (Plasmodium, Theileria and Toxoplasma) and Arthoropoda (Dermatophagoides and Leptotrombidium)

In BioHackathon 2010

HABITAT

WATER

FRESH WATER

SEA WATER

SUFACE SEA

DEEP SEA   LAKE   POND

TAXONOMY

- ☐ Integration of KEGG and other biological databases by the Semantic Web technology

- ☐ Construction of RDFs for the meta information (e.g. habitat) of the currently available genomes

- ☐ etc..
